

**ABSTRACT**

The invention allows a casino, or other entity, via a game machine, to provide relevant information at appropriate times, and/or in response to appropriate events, to players using the game machine. A dynamic and flexible system  
5 adapted to interact with players on an individual basis by aiding in the management, determination, distribution, and delivery of promotional, inspirational, instructive, informational, communicative, incentive, and other types of messages, is provided. Various methods are provided to ensure that receiving  
10 messages at a game machine enhances a player's overall gaming experience by selectively outputting helpful and desirable messages to players while minimizing interference with the players' gaming and to avoid overwhelming players with unsolicited, unwanted, and/or irrelevant messages.
